EDUCATION

Christ University, Bengaluru **June 2023 - Present**
Bachelor of Technology, Artificial Intelligence and Machine Learning *CGPA - 8.70*

Delhi Public School, Ghaziabad **April 2022 - April 2023**
Class XII *Percentage: 87.4%*

Delhi Public School, Ghaziabad **April 2020 - April 2021**
Class X *Percentage: 93.2%*

SKILLS AND PROFICIENCIES

Programming: Python (Primary), Java, C++, SQL
AI / ML: LLMs, RAG, AI Agents, LangChain, LangGraph, Vector Search, Scikit-learn
Frontend / Backend: FastAPI, Flask, React, JavaScript, REST APIs, Microservices, Asynchronous Processing
Infra & Tools: Docker, Kubernetes, AWS, Linux, Git/GitHub, Postman
Databases & Analytics: PostgreSQL, MongoDB, MySQL, Pandas, NumPy, Power BI, Tableau, AWS QuickSight, Advanced Excel
CS Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks, Statistical Analysis, A/B Testing
Business & Strategy: Business Analysis, Market Research, Customer Success, Stakeholder Management, Go-to-Market Strategy

WORK EXPERIENCE

Inkspilled **Jan 2026 – Apr 2026**
AI Engineer Intern *Hauz Khas, Delhi*

- Automated **20+** business workflows across **3 international client engagements**, reducing manual effort by **45%** by deploying **10+** production-ready AI applications, data-processing pipelines, and decision-support solutions.
- Accelerated solution delivery by **36%** by engineering AI-powered backend services, asynchronous processing pipelines, and scalable automation infrastructure supporting **50K+** document retrieval operations.

Paytm **Jul 2025 – Dec 2025**
Backend Software Engineer Intern *Noida, Uttar Pradesh*

- Optimized data-intensive workflows processing **10M+ database records**, reducing query latency by **25%** through database indexing, intelligent caching, transaction optimization, and efficient SQL data access.
- Built and optimized scalable backend microservices and REST APIs supporting **250K+ daily API requests**, reducing average response latency by **34%** through query optimization, asynchronous processing, and efficient service design.
- Developed **6+** production-grade backend modules with **20+** engineers, product managers, and QA engineers, enabling secure feature delivery while maintaining **95%** availability across high-volume fintech workflows.

PROJECTS

Multi-Agent Financial Due Diligence Platform | *Python, FastAPI, PostgreSQL, LangChain, FAISS, Docker, OpenAI API* **Apr 2026**

- Built a scalable financial intelligence platform analyzing **10K+ SEC filings**, earnings transcripts, and financial statements, automating **46%** of institutional due-diligence workflows via backend APIs and LLM-powered reasoning.
- Reduced end-to-end investment research time from **2.5 hours to 70 minutes** by engineering scalable retrieval pipelines, contextual ranking, intelligent caching, and asynchronous multi-agent orchestration.

Supply Chain & Inventory Decision Intelligence Platform | *Python, SQL, PostgreSQL, AWS, QuickSight, XGBoost* **June 2026**

- Architected a scalable supply-chain analytics platform processing **1.5M+ retail transactions** across **25K+ SKUs**, integrating ETL pipelines, demand forecasting, inventory-health metrics, and anomaly detection to flag stockout and overstock risks.
- **Reduced forecast error by 23%** versus baseline models and improved inventory-risk detection F1 by 28% through SKU-level forecasting and statistical validation, enabling **14-day** forward visibility into stockout and overstock risk.

AccountIQ | *Python, FastAPI, PostgreSQL, SQLAlchemy, Celery, Redis, Groq API, Docker* **August 2026**

- Architected an agentic account intelligence platform integrating **5** data-provider adapters to consolidate company profiles, financial filings, news, and business signals for account analysis and procurement-focused prospect prioritisation.
- Engineered asynchronous AI workflows to identify procurement stakeholders, synthesise account insights, and generate company summaries and personalised B2B outreach emails, targeting **40%** less research time and **30%** faster outreach.

ACHIEVEMENTS

- **HackVerse Winner, MIT Bengaluru:** Built and deployed an AI-powered, blockchain-based KYC solution in 24 hours.
- **Lovelace Hackathon Runner-Up, MIT Bengaluru:** Secured runner-up in a 72-hour hackathon.
- **Code Neutral, ACS College:** Achieved second runner-up in a 24-hour state-level hackathon.
- **SIT Vibeathon Winner, SAP Labs:** Won an industry-hosted technology competition at SAP Labs, Bengaluru.
- **Overall Coordinator, NASA Space Apps:** Coordinated 400+ participants and 15+ mentors, judges, and volunteers.
- **IEEE Computer Society Chairperson:** Led a 500+ member technical community; drove engagement through 50+ events.
- **Campus Head, Christ Incubation Centre:** Led 25+ innovation initiatives impacting 1,500+ students; supported 30+ startup ideas and headed YESUMMIT with 1,200+ attendees across 15+ Indian states.
